- 4500 litre

**HIRECORP**

## Diesel Trailers

- 1200 - 1500 litre

**HIRECORP**

# NON DESTRUCTIVE VACUUM EXCAVATION

Don't get caught out! You can now locate and expose the underground services before you damage them with conventional excavation. Hirecorp has the answer.... Non Destructive Vacuum Excavation. A high pressure water jet cuts into material while a high strength vacuum removes it without damaging underground utilities. Available in 100 gallon(379 litres) and 250 gallon (946 Litres) capacity

## Vacuum 379 Litre ( 100 gallon)

- Trailer Mount - Mechanical brakes

**HIRECORP**

## Vacuum 946 Litre ( 250 gallon)

- Trailer Mount - Electric Brakes

**HIRECORP**

The rotary nozzle used for hydro-excavating allows for higher water pressure to be used without damaging underground utilities.

Potholing and valvebox clean out tool.

Ideal for smaller jobs in the fencing, plumbing, gas, electrical and fiberoptic construction markets.
